PROJECTS

E-COMMERCE WEBSITE
ELECTRONIC DEVICE STORE

Modules : User side(client side) and Admin side.

User : in user side users can create new account and also have a login screen. users can purchase product from our store and also have features to add products to cart and it will permanently store in user side. items only clear when the user made purchase or clear items from cart.

Admin : in admin side admin can view and edit orders and details and also admin can only add,update,delete products.

Landing Page : Users can view all the product if user is authenticated users can purchase products otherwise redirect to login page when the user click checkout button.

Cart : List all the items and quantity of product, users can increment the product quantity and also decrement product quantity.

Checkout : In checkout page shipping address will take from user it will store order side in admin panel.

Payment Gateways: PayPal - Used in my payment section by the help of PayPal sandbox developer options.

Razor Pay- i have used razor pay payment option in my project so it is more easy to purchase than PayPal.

Hosted IN AWS:
 AWS is one of the best cloud service so i have hosted my project into AWS and it's providing bulk of offers and lot's of features.
Ngix:
    Used Nginx service to increase perfomence for my website
